

Setting up Voicemail

From your digital phone:

1. Dial *98
2. Create a PIN (Personal Identification Number). Your temporary PIN is the last four digits of your digital phone number. You will be prompted to enter and confirm a new PIN.
3. During setup you will be prompted to record your name. Once recorded, your name will be played back to you to determine if you want to keep it or re-record it.
4. Dial 1 to change your greeting
5. Dial # to keep your greeting

Selecting a Voicemail Greeting

There are several options for voicemail greetings. Select the type you would like to set up and follow the prompts:

- Dial 1.** For a personal greeting (a message that you record)
- Dial 3.** For a system greeting or change the recorded name
- Dial 5.** For a greeting callers hear when your phone line is busy

Retrieving Voicemail

Voicemail can either be accessed from your digital phone or remotely from any other phone.

From your digital phone:

- Dial *98 and enter your PIN, followed by #

From another location/phone:

1. Dial **239-219-1098** and when prompted, enter your phone number, followed immediately by #
2. When prompted, enter your PIN, followed immediately by #

Managing Voicemail

- Dial 1** To repeat the message
- Dial 2** To save message as new
- Dial 3** To delete your message
- Dial 4** To reply
- Dial 5** To send a copy
- #** To leave as saved

▲ Anonymous Call Rejection:

Reject incoming callers who have blocked their directory or identifying information.

- To enable, dial ***77**
- To disable, dial ***87**

▲ Automatic Recall:

Return the last incoming call by dialing ***69**.

▲ Do Not Disturb:

Block your line temporarily to prevent incoming calls. Outgoing calls can still be made as normal, but incoming calls are not connected.

- To enable, dial ***78**
- To disable, dial ***79**

▲ Caller ID:

Inbound: See the name and the phone number of an incoming call before answering the phone.

Outbound: Block your name and phone number from being displayed when calling someone.

- To withhold the calling number for a single call, dial ***67**
- To allow delivery of the calling number if it is blocked by default, dial ***82**

▲ Three Way Calling:

Use one line to setup a three-way conference call. When talking to one person, press the **flash/hook** button to put them on hold. Next, dial the third person, and press **flash/hook** again to join the three callers.

▲ Call Waiting:

Receive an incoming call while on the phone with another caller. When speaking to another caller, a tone will alert you to an incoming call. Press the **flash/hook** button to put your current caller on hold and answer the new caller.

To disable Call Waiting for the next call, dial ***70** before the call.

▲ Selective Call Rejection:

Select a list of numbers from which incoming calls are automatically rejected.

To configure, dial ***60**, which will take you to the Screen List Editing menu.

▲ Call Forwarding:

Forward calls to another location, mobile phone or device.

- **To setup from your digital phone:** Dial ***72** and wait for the 2nd dial tone. Dial the number you want calls forwarded to. A series of beeps indicates the feature is activated. To deactivate, dial ***73**.
- **To setup remotely:** Dial **239-219-1099**, then dial your 10-digit digital phone number followed by your PIN. Wait for the dial tone, dial ***72** plus the number calls are to be forwarded to. To deactivate, dial ***73**.

Call Forwarding Delayed: Forward calls from your line to an alternative number only if they are not answered on your line within a certain number of rings. To use this feature, voicemail must be deactivated.

- To enable, dial ***92** and wait for the 2nd dial tone. Dial the number you want calls forwarded to. A series of beeps indicates this is activated. To disable, dial ***93**.

Call Forwarding Busy: Forward incoming calls to an alternative number only when your line is busy. To use this feature, voicemail must be deactivated.

- To enable, dial ***90** and wait for the 2nd dial tone. Dial the number you want calls forwarded to. A series of beeps indicates this is activated. To disable, dial ***91**.

Selective Call Forwarding: Select a list of calling numbers whose calls will automatically be forwarded. To configure, dial ***63**, which will take you to the Screen List Editing menu.

▲ Find Me Follow Me:

Configure additional numbers that will be rung instead of or as well as your own number, any of which can answer the call. Once one number has answered the call, ringing on the other configured numbers is stopped. Additional numbers must be set up through phone.summit-broadband.com.

- To enable, dial ***371**
- To disable, dial ***372**

▲ Speed Calling (Speed Dialing):

Allows one-digit or two-digit codes to be used as shortcuts for selected phone numbers.

One Digit Speed Calling:

- To configure, dial ***74** followed immediately by the desired speed calling code (2 through 9) and the 10-digit phone number. You will then hear a confirmation tone.
- To use after configuration, dial the assigned one-digit speed calling code followed immediately by #.

Two Digit Speed Calling:

- To configure, dial ***75** followed immediately by the desired speed calling code (20 through 49) followed by the 10-digit phone number. You will then hear a confirmation tone.
- To use after configuration, dial the assigned two-digit speed calling code followed immediately by #.
